

What are we learning about?

Year 3/4 pupils were excited to experience various medical activities to introduce them to the human body. The children also learnt about the need to stay active and healthy and were shocked to hear that doctor surgeries are full in the local area!

Throughout the project, there will be a variety of professionals from across the medical world visiting Year 3/4 to talk to the children about their roles. Children will be encouraged to think of big questions whilst discovering fascinating human body facts. They will learn the importance of having a healthy mind as well as a healthy body. Children will work hard to learn about what they need to qualify as junior doctors.

Once they have achieved this, we will hold an 'open' surgery to give free 'health checks' to family members.

Local surgery FULL!

Over the Christmas period, care of themselves. He Rer it has emerged that our believes that if people foll local doctors' surgery has knew more about keeping imp been flooded with ill themselves fit, healthy, The people. So much so that had more knowledge of The the doctors and nurses, basic first aid as well as that who already work long how the body works then rela hours, are having to put on there would be less ill the extra clinics and people. His team has been beh appointment times. Dr. encouraging local of a kneejerk told us at the residents to live healthier exp Rover that his surgery is at lifestyles which they say in l breaking point and that reduces the number of its the people of Rownhams illnesses people suffer beh should be taking better from. con

Learning Behaviours

- ⇒ We will be using our 'Team Builder' button. Children will develop time management, co-operation and listening skills.
- ⇒ During the outcome, they will use their problem solving buttons as junior doctors to diagnose a 'medical issue'.

Outcome:
Parents and Carers are invited to...

Rownhams Health Surgery

Wednesday 12th February 2020
2:30—3:00pm

Can't wait until then?

Check out this informative and interesting website to discover more about the amazing human body.

HOME LEARNING

PRESCRIPTION

Dr Phillips, Dr Tompkins, Dr Warner and Dr Long prescribe the following home learning:

Please choose ...

Option 1

Fact finding mission! Find 10 fascinating facts about the brain, the eyes, the ears or the nose and choose how to present them.

Option 2

Create a model of the brain, eyes, ears or nose to help to explain their function. You could make your models out of card, clay, Lego, papier-mâché, jelly or even a cake... the possibilities are endless!

Home learning will be displayed at the outcome.

Due in by Friday 7th February

To be taken once a week before bedtime!

Doctor Doctor! I've got a strawberry stuck in my ear!
Doctor. Don't worry, I think I've got some cream for that!

Doctor Doctor! I think I need glasses.
Yes I think you do as this is a fish and chip shop.

Doctor Doctor! I feel like a bell.
Doctor: Take these and if they don't work give me a ring.

Doctor Doctor! How do I stop my nose from running?
Doctor: Stick your foot out and trip it up.
