

Year 1/2 Home Learning Activities

Here are your home learning activities for our 'Winter Wonderland' project. You need to choose at least 1 activity from the boxes below to complete over this half term. Please bring your completed activities into school as you finish them for us to share. All home learning should be in school before **Friday 7th February**. Thank you.

If you think of something different to those that are listed, we look forward to seeing your creative ideas. We hope you have lots of fun completing your home learning project.

Make a spring garden and write some helpful instructions to teach others how to do the same. You might like to use natural objects, Lego, K'nex, paper or card.

Become a photographer!

Use what you have learnt in the photography workshop to take your own photos of wintery scenes.

Look at a map and locate the 7 continents and 5 oceans. Can you find where the different animals live?

Plant some bulbs and observe how they grow. How could you record your findings?

Maths Challenge:

Mild- Create a 'part part whole' model and write 2 number sentences to match it.

Spicy- Create a 'part part whole' model and write 2 addition and 2 subtraction number sentences to match it.

Hot - Create a 'part part whole' model and write all 8 facts.

E.g. $18=10+8$, $10+8=18$, $18=8+10$, $8+10=18$,
 $18-10=8$, $8=18-10$, $18-8=10$, $10=18-8$

What could you do to prove your answer?

Write a description of a wintery scene. How many adjectives can you think of?

Put your wellies on and find some icy puddles to jump in!

Create a collage of a wintery scene. You might like to go outside and use natural objects to make a 3d landscape.

Go for a nature walk and see how many animals you can spot.
